Update on Honduras production

On 20 April 2018 Wishbone Gold announced that its Honduras processing plant was fully operational and undertaking batch processing. Full production was anticipated by the Board to commence in May 2018 but has been delayed pending receipt of the appropriate permits for processing larger amounts of gold ore. The Company is in discussions with its joint venture partners on this matter and is pursuing the relevant permits directly with the Honduran government. Further announcements will be made in due course.

Wishbone Gold anticipates announcing its final results for the year ended 31 December 2018 in the next couple of weeks.
