### **Heritage Survey Over Additional Targets at Red Setter Project Completed**

#### **Patersons Range, Western Australia**

Wishbone Gold Plc (AIM: WSBN, AQSE: WSBN), is pleased to announce that a heritage survey has been completed at the Company's Red Setter Gold-Copper Project located 13 km south-west of the Telfer Gold Mine, in the Patersons Range of Western Australia. The survey did not identify any heritage sites at Red Setter. The additional surveys have increased access to peripheral targets beyond those already cleared, where drilling will start in the next few weeks. The heritage survey team has now moved down to the Cottesloe Project located 55 km south-southwest of the Telfer Gold Mine.

The Company's Red Setter and Cottesloe Projects (Figure 1) are located west of Newcrest Mining's Telfer Gold-Copper Mine and ~60km west of Newcrest and Greatland Gold's Havieron gold-copper discovery.

The first phase of the drilling is for 3,000m at Red Setter, with the second phase of the contract for a further 7,000m of drilling split between WSBN's Red Setter Project which has heritage clearance, and the Company's Cottesloe Project to the south, subject to the ongoing heritage survey.

**Richard Poulden, Wishbone Gold's Chairman, commented, "We are very pleased to have the heritage clearance at Red Setter completed for additional peripheral targets. This now gives the company increased capacity to drill further holes based on the success of the first phase of drilling. The drill rig is still on track to start drilling later this month and I look forward to the rig mobilising from Perth."**
