Drilling Underway at Red Setter Project

Patersons Range, Western Australia

Wishbone Gold Plc (AIM: WSBN, AQSE: WSBN), is pleased to announce drilling is underway (Photo 1) at the Company's Red Setter Gold-Copper Project in the Patersons Range area in Western Australia.

The Red Setter Project is situated on the 57.4km² wholly owned Exploration Licence EL45/5297 and is located 13 km south-west of Newcrest Mining's Telfer Gold-Copper Mine and 60km west of Newcrest and Greatland Gold's Haverton gold-copper discovery.

The first phase of the drilling contract is for 3,000m of drilling at Red Setter, with the second phase of the contract for a further 7,000m of drilling split between WSBN's Red Setter Project and the Company's Cottesloe Project to the south.

The track mounted drilling rig is a multi-purpose rig, capable of 150m Reverse Circulation and diamond core to 1,200m.

Richard Poulden, Wishbone Gold's Chairman, commented, "We are very pleased for drilling to have started at Red Setter. It is exciting to be using DDSR's multi-purpose rigs which should provide a much more efficient program. We will provide updates as the work progresses."
